

Hybrid Systems

Chair: Ricardo Sanfelice

Summary

The Technical Committee on Hybrid Systems is dedicated to providing informational forums, meetings for technical discussion, and information over the web to researchers in the IEEE CSS who are interested in the field of hybrid systems and its applications. The current chair of the TC started in January 1, 2016.

Membership

The Hybrid Systems TC has currently 47 members. Currently, of the 47 active members, 44 are from academia and 3 from industry, while 12 members are affiliated with US institutions/companies and the rest are from overseas.

Invited Sessions

The TC is part of the organization of the invited session entitled “Recent Advances in Stability and Control of Hybrid Systems” at the IFAC NOLCOS Conference in August 2016 and the invited session entitled “Variational Analysis in Dynamics and Control” at the IEEE CDC in December 2016 (the latter is under review).

Other Activities

The TC webpage has been updated with the new chair information and member list.

An email list was created using Google Groups to facilitate the exchange of information between the TC members.
